

PROJECT EXPERIENCE

Construction Inspection

IDOT Construction Inspection ■ IL 336 / US 67 / IL110 McDonough County, Illinois

Subconsultant

Millennia provided Phase III engineering services for the \$36 million project which consisted of new construction of northbound lanes and all incidental structures serving as a bypass around Macomb, Illinois. The project included 6.53 miles of subgrade stabilization, HMA pavement structure, and 8 bridges in total: 1 river crossing, 3 animal crossings, and 4 overpasses. Access-controlled ramps at the US 136 intersection, as well as an at-grade tie in at US 67, served as a major portion of the project scope. Also included in the scope was the reconstruction/realignment of intersection side roads and their drainage systems.
